

METHODS FOR URBAN ETHNOGRAPHY
MA in Social Research - Example University

ABSTRACT

A methodological thesis on doing ethnography in contested urban spaces, comparing participant observation, go-along interviews, and visual methods.

1. THE PROBLEM OF ACCESS

Negotiating entry to community settings; positionality and reciprocity.

2. GO-ALONG INTERVIEWS

Walking with participants surfaces place-meanings that sit-down interviews miss.

3. CODING AND RIGOUR

An iterative coding framework, memoing, and inter-coder checks.

4. ETHICS

Consent, anonymity, and the duty of care to participants.
